

Ultimate 11 & Ultimate 10 Fuel Treatment

Ultimate 11's cutting-edge formula contains components that are not found in other products. The proprietary surfactant reduces the fuel droplet size by a factor of eight, making the combustion process more efficient -- maximizing power and reducing soot. Ultimate 11 utilizes hydrogen polar bonding to chemically bond with water, thereby carrying the water through the combustion process. Don't deal with water, eliminate it.

Ultimate 10 has all the features of Ultimate 11 except the antigel additive. Instead, we have added additional Cetane (6-8 points) for customers who do not need antigel and want more power

Features & Benefits

- Significantly reduces regenerations
- Greatly Improves combustion efficiency
- Removes water and microbes
- Boosts Cetane - 4 to 6 points
- Contains a full winter package, ensuring reliability in severe weather
- Prevents injector deposits from building up
- Greatly reduces corrosion
- Minimizes fuel oxidation
- Dissolves gum and varnishes
- Improves fuel lubricity
- Stabilizes fuel and diminishes biodiesel degradation

Available Sizes	Part Number
Ultimate 11	
12 OZ EA	DF660-1
12/12 OZ	DF660
6/1 QT	DF650
2/2.5 Gal	DF652
5 Gal	DF657
55 Gal	DF655
Ultimate 10	
2/2.5 Gal	DF662
