

## Synthetic Oil System Cleaner

**The vapor action** of this product used in conjunction with a quality API licensed Heavy Duty Motor Oil will ensure the engine is running at its highest efficiency. The cleaner decreases blow-by, removes oil contaminants and keeps critical surfaces clean.

Following the use of EGR & Induction System Cleaner, an oil change is required. Add Diesel Force™ Oil System Cleaner to the engine before the oil change, circulate in the oil for approximately 15 minutes, and drain along with the used oil. This product is formulated with premium quality synthetic base oils to carry powerful detergents and high quality dispersant additives.

### Features & Benefits

- Removes particle buildup in ring lands, reducing cylinder wear
- Greatly reduces crankcase loading
- Eliminates cold start issues related to HEUI style injectors
- Restores compression and reduces blow-by
- Contains no damaging solvents
- Vapor action cleans hard to reach passageways
- Restores cylinder balance
- Extends life
